Dear Hiring Team at Quality Counts, LLC,

I am excited to submit my application for the Junior Software Developer position at your company. With a background in computer science and internship experience in React, modern JavaScript, Node, Express, and Docker, I am confident in my ability to contribute effectively to your Quality Counts Development team.

During my internship, I have honed my problem-solving skills and developed a passion for exploring new technologies. My experience has provided me with a solid foundation in React, modern JavaScript, Node, Express, and Docker, allowing me to quickly adapt to new tools and frameworks. I am eager to apply my technical skills and knowledge to contribute to the innovative work being done at Quality Counts.

While my internship experience has primarily focused on frontend and backend technologies, I am very familiar with Python from my school work. I have experience working with Python libraries such as NumPy, Pandas, PyTorch, and TensorFlow, and I am eager to further develop my skills in AI machine learning, particularly in object detection models.

I am impressed by Quality Counts' commitment to leveraging AI technology to drive innovation in transportation data collection and its dedication to diversity and employee engagement. I am excited about the opportunity to learn and grow within your supportive and inclusive culture while contributing to the development of enterprise applications that improve roadway safety and efficiency for communities.

With a strong problem-solving mindset, a passion for new technologies, and a solid foundation in Python, React, modern JavaScript, Node, Express, and Docker, I am confident in my ability to excel in the role of a Junior Software Developer at Quality Counts. I am excited about the prospect of working with your experienced team to advance and maintain your suite of enterprise applications while furthering my skills in AI machine learning.

Thank you for considering my application. I look forward to the possibility of contributing to the innovative work being done at Quality Counts. I am excited about the opportunity to learn and grow with your team while making a meaningful impact within the transportation data collection space.

Warm regards,

Brandon
